EXPERIENCE

Web Designer

University of Central Florida (UCF) | Feb 2025–Present

- Develop and maintain WordPress websites, implementing new features, improving existing functionality, and troubleshooting issues across CMS and code-based workflows.
- Assist with WordPress plugin and theme development using HTML, CSS, JavaScript, PHP, and site-specific development practices.
- Rework and optimize existing code and content workflows to improve efficiency and maintainability across large sets of web content.
- Translate requests from faculty, staff, and communications teams into responsive, accessible web experiences while maintaining visual consistency and usability.
- Perform accessibility remediation, including PDF-to-HTML conversion and development of tools to improve accessibility of archived digital documents.
- Develop Python scripts and other workflow improvements to reduce repetitive web-production tasks.
- Collaborate with web developers, marketing personnel, faculty, and staff to troubleshoot problems, recommend solutions, and take ownership of new web assignments.
- Create supporting visual and digital content, including page layouts, image editing, typesetting, event materials, and social media assets.

Graphic Designer

UCF Recreation & Wellness Center | Jan 2025–May 2026

- Design digital and print marketing materials including social media graphics, posters, merchandise, and campaigns.
- Create branded visual content while balancing deadlines, audience needs, and campaign objectives.
- Collaborate with creative leadership to maintain consistency across campus marketing materials.
- Manage multiple concurrent projects in a high-volume production environment.

Math Academic Tutor

St. Johns River State College | Sep 2022–Dec 2023

- Provided individualized and group tutoring in STEM subjects while adapting explanations to different learning styles.

PROJECTS

Recipe Jungle

Full-Stack Web Application | 2026

- Developed a full-stack recipe platform using React 19, Supabase, PostgreSQL, and Vercel deployment.
- Built responsive interfaces, database functionality, authentication workflows, and administrative features.

Preserv

Senior Capstone Team Lead & Developer | 2025–2026

- Led a five-person team and managed development workflows using Git.
- Developed the Recipes feature: PHP backend logic, MySQL, JavaScript functionality, and CSS implementation.

Additional Experience

- Completed UI/UX redesigns, branding projects, and responsive mobile prototypes.

EDUCATION

Bachelor of Arts in Digital Media - Web & Interactive Media Track
Magna Cum Laude | GPA: 3.905

University of Central Florida | May 2026
